Good Observations

Proper and Safe Material Stacking and Handling

Good Observations

Adequate Welfare Facilities in the Mobilization Area

**Area of
concern**

Fire Hazard

Lack of fire point and signage

Area of concern

UNSAFE ACT

Unsafe acts worker (Sleeping) and hazardous conditions were observed.

Area of concern

Storage of Hazardous chemicals

All chemical materials must be stored in accordance with their SDS, ensuring proper ventilation and separate storage areas.

Main Concerns that need appropriate actions

1 -NO First Aid box (Station) in all PSP stations.

- The first aid station is mandatory for fast medical treatment of any injury in the work site.

2-Fire Hazard.

- Fire points needed to be located in all site areas in the material storage area, Generator, and fuel storage area, Hot works on-site.

3-Storage of chemicals.

- Flammable substances must stored in a separate area from other materials.

4-HSE signage is Missing at the work site.

- Storage, Mobilization, and Generator Area.
